

Omega-Phones

Create the ideal functionality for *your* work environment. Iwatsu's Omega-Phone product line is complete with a wide range of business telephones that can be customized to fit your exact needs. Whether you want digital, wireless or IP telephones, the Iwatsu Omega-Phone series grows with your business requirements.

IWATSU®

Executive Digital Key Telephone

The Executive Digital Key Telephone is an advanced version of the Enhanced station, complete with added features including a built-in headset connection, full-duplex DSP speakerphone and a wall-mountable, seven-angle adjustable station base. Compatible with both the Enterprise-CS and ADIX-VS systems, the Executive station can migrate with you as your business and system requirements grow.

- Includes all features from the Enhanced station
- Built-in full-duplex DSP speakerphone
- Integrated headset connection
- Wall-mountable, seven-angle adjustable station base
- Red and green LEDs for feature and line status indication
- Individual volume control keys for handset, speaker and ringer
- Available with or without field-upgradeable liquid crystal display (LCD)

Attendant Position

For enhanced call processing, the Executive telephone can be converted into an attendant position by simply attaching the Direct Station Selection (DSS) unit.

- 100 keys for one-touch access to call system extensions
- 20 programmable keys for specific attendant features
- 40-character liquid crystal display (LCD)

Enhanced Digital Key Telephone

The Enhanced Digital Key Telephone is an easy-to-use station designed with flexible features. Compatible with both the Enterprise-CS and ADIX-VS systems, the Enhanced station can migrate with you as your business and system requirements grow.

- 12 programmable keys, expandable to 24 keys
- Oversized 2-line / 16-character backlit liquid crystal display (LCD)
- 8 ring tones / 4 volume settings
- Dual-function call indicator lamp
- Built-in speakerphone
- Red and green LEDs for feature and line status indication
- 10 personal speed dial / up to 900 system speed dial numbers

Executive IP Phone

Whether you're working from home or across the globe, the Executive IP Phone lets offsite workers communicate with in-office functionality. Remote users simply connect their Executive IP Phone via a Virtual Private Network (VPN) or managed IP network to access the Enterprise-CS system features anytime, anywhere. In a matter of minutes, remote workers are setup with their office extension and can seamlessly intercom or extension dial a co-worker, transfer calls and even view the phone status of a co-worker from anywhere worldwide.

- Get in-office feature access and functionality anytime, anywhere
- Communicate with other Enterprise-CS networked offices and remote workers
- Designed with the same easy-to-use features as the Executive digital station
- Convenient menu keys to access, scroll and display features on the LCD
- Built-in Layer 2 switch for connection to another network device (PC or printer)

Standard Digital Key Telephone

The Standard Digital Key Telephone is designed with practical features to meet your basic communications needs.

- 4 fixed feature keys / 8 programmable keys
- 8 dual-color LEDs for feature and line status indication
- Optional internal speakerphone unit
- Incoming call indicator lamp
- Supports single line/modem connection on outgoing calls

Omegatrek Digital Wireless Handset

Remain accessible for business calls, even away from your desk. Unique to Omegatrek, you get the feature access and functionality of your digital desktop phone in a portable 3.7 oz. handset. Communicate anywhere in your facility with Enterprise-CS system features such as transfer, hold, conference and voice mail access. Omegatrek can provide more than 1,000,000 sq. ft. of flexible in-building coverage as it operates on base stations located throughout your facility. Wherever your schedule requires you to be, Omegatrek enables you to remain accessible and in-touch.

- Remain productive and accessible even away from your desk
- Transfer calls and access voice mail while roaming your facility
- Program 500 speed dial numbers and multiple ring tones
- Talk hands-free with an integrated headset jack
- Customize your handset with programmable multipurpose keys
- Get more than 1,000,000 sq. ft. of flexible in-building coverage

Digital Cordless Key Telephone

With seven times the range of a traditional cordless phone and better voice clarity than a desktop phone, the Digital Cordless Key Telephone enables you to increase mobility in the workplace.

- Super long range 900 MHz digital spread spectrum
- Liquid crystal display (LCD) and message indicator
- 4 programmable feature keys / headset jack
- Stores up to 20 speed dial numbers
- Low battery protection system
- Separate wall-mountable base unit and drop-in charge unit

Attendant Console

Designed specifically to efficiently process incoming calls, the Attendant Console is a single desktop station that simplifies call handling.

- 24 programmable feature keys for specific attendant features
- 30 programmable DSS keys for one-touch access to call system extensions
- 40-character liquid crystal display (LCD)

Digital Doorphone

The Digital Doorphone provides cost-effective building security as it requires visitors to make an intercom call to gain entrance to your building. Receptionists can remotely unlock the door by pressing a key on their telephone.

- Cost-effective and discrete facility security
- Convenient one-touch button to request access
- Optional remote control relay unlocks door from your phone
